Unveiling INSEE Ecocycle's Sustainability DNA

INSEE Ecocycle Receives Green Industry Level 5 "Green Network" Award 2026 Reinforcing Its Commitment to Advancing Environmental Sustainability Across the Supply Chain

INSEE Ecocycle represented by Mr. Bruno Fux, Chief Executive Officer of INSEE Ecocycle, received the Green Industry Level 5 (GI5) "Green Network" Award 2026 from Mr. Varawut Silpa-archa, Minister of Industry, at the Green Industry Award 2026 ceremony held on 9 September 2026 in Bangkok.

The Green Industry Level 5 "Green Network" is the highest level of Thailand's Green Industry program. Receiving the GI5 Green Network Award marks another important milestone for INSEE Ecocycle and reflects the company's commitment to responsible business practices and environmental sustainability. The recognition highlights INSEE Ecocycle's approach to working collaboratively with its value-chain partners and supporting them in strengthening environmental management, and participation in sustainability initiatives.

The Green Industry Award 2026 was organized by the Ministry of Industry through the Department of Industrial Works to recognize industrial establishments that achieved Green Industry Level 4 "Green Culture" and Level 5 "Green Network" certification. A total of 184 awards were presented, comprising 139 Green Culture awards and 45 Green Network awards.

INSEE Ecocycle remains committed to strengthening collaboration with its suppliers, customers, business partners, communities, and stakeholders to build a stronger Green Network and contribute to the sustainable development of Thailand's industrial sector.

INSEE Ecocycle Celebrates 25 Years of Driving Sustainable Waste Management and Industrial Services at "25 Years of Partnership for a Net Zero Future"

INSEE Ecocycle, celebrated its 25th anniversary by hosting the "25 Years of Partnership for a Net Zero Future" event at Brighton Grand Hotel Pattaya, Chonburi Province, on 17 July 2026. The event marked a significant milestone in the company's journey while reaffirming its strong partnerships with customers, business partners, and government agencies in advancing sustainable waste management and industrial services, supporting the transition toward a Net Zero future.

Mr. Bruno Fux, Chief Executive Officer, officially opened the event by expressing his sincere appreciation to customers and partners for their trust and collaboration over the past 25 years. He emphasized that the company's achievements have been made possible through the collective commitment of all stakeholders who share the common goal of building a more sustainable future for industry and society.

The event also featured a seminar focused on knowledge sharing and practical approaches to greenhouse gas emissions reduction. Distinguished speakers from government agencies, international organizations, and the private sector shared their expertise and perspectives, including Dr. Kittisak Prukkanone, Director of the Division of Strategy and International Cooperation, Department of Climate Change and Environment; Dr. Sirakarn Leungsakul, Director of Industrial Environment Technology Promotion Division, Department of Industrial Works; Ms. Chanoksuda Pongsawang, Project Advisor, Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH; Mr. Chawanin Phetket, Facilities Engineering Advisor & Lower Carbon Champion, Chevron Thailand Exploration and Production, Ltd; Dr. Orathai Pongruktham, Circular Economy and Sustainability Director, Dow Thailand; Mr. Sebastian Frisch, Managing Director, Green Forest Solutions GmbH; and Mr. Oleg Arefev, Territory Manager, Vereco Boru Hatti Kontrol LLC.

The celebration concluded with the presentation of the Sustainability Award, recognizing customers and partners who have demonstrated outstanding commitment to integrating environmental stewardship into their business operations. The awards reflect the shared dedication to sustainable growth and long-term collaboration. This milestone celebration further underscores INSEE Ecocycle's commitment to driving meaningful change and creating lasting value for businesses, communities, and the environment as it continues its journey toward a Net Zero future.

INSEE Ecocycle Supports the 2nd Next Gen Env Camp, Sharing Expertise on Sustainable Industrial Waste Management

INSEE Ecocycle supported the 2nd Next Gen Env Camp on 27 July 2026 at Grand Sappaya Hotel, Chachoengsao, organized by the Environmental Management Industry Group under the Federation of Thai Industries (FTI).
The camp was designed to bridge the gap between academia and industry by sharing knowledge and practical experiences in environmental management. The program focused on the evolution of environmental management systems in Thailand, promoting environmental awareness, and strengthening collaboration between educational institutions and the industrial sector.

On this occasion, Ms. Nattaya Thaijiamaree, Senior Sales Representative – Waste Management, participated as a speaker in the session titled "The Safe Destination of Industrial Waste: A Responsibility That Cannot Be Compromised." She shared insights and practical experience in the safe and responsible management of industrial waste through co-processing in cement kilns.

INSEE Ecocycle's participation in the event reflects the company's commitment to sharing its expertise and experience in environmental management while supporting the development of the next generation of environmental professionals. By helping build a skilled and knowledgeable workforce, the company continues to contribute to Thailand's journey toward a more sustainable future.

INSEE Ecocycle Welcomes Representatives from the Chulalongkorn University Office of Property Management to Its On Nut Operations Site and Saraburi Plant

INSEE Ecocycle welcomed representatives from the Office of Property Management, Chulalongkorn University, for a visit to its On Nut operations site and Saraburi plant on 31 August to learn about sustainable waste management practices and how waste can be recovered and utilized in line with circular economy principles.

During the visit to the On Nut operations facility, the representatives learned about INSEE Ecocycle's waste management processes, particularly the management of non-recyclable waste, which is processed into Refuse-Derived Fuel (RDF).

The delegation then visited the Saraburi plant to learn about the production of alternative fuel from waste and co-processing technology in cement kilns. This provides a sustainable solution for managing non-recyclable waste, helping to reduce the amount of waste sent to landfill while promoting the efficient and maximum use of resources.

The visit provided the representatives with an opportunity to gain an overview of the waste management process, demonstrating how waste can be properly managed and transformed into new value, while helping to reduce environmental impacts and drive sustainable resource management.

Sri Lanka's First Waste Management Company to Achieve ISO 10004:2018 Customer Satisfaction Certification

INSEE Ecocycle achieved ISO 10004:2018 Customer Satisfaction Certification, becoming the first waste management company in Sri Lanka to receive this internationally recognized standard. The certification demonstrates a disciplined approach to understanding customer expectations, collecting and analysing feedback, measuring satisfaction, and converting customer insights into practical service improvements. It also confirms that customer experience is supported by defined processes, accountable teams, consistent communication, and regular management review across the organization. These practices enable INSEE Ecocycle to identify emerging needs and improve responsiveness.

This milestone strengthens confidence in INSEE Ecocycle as a trusted waste management partner and reinforces customer-centricity as a core business principle. Independent recognition of its customer satisfaction system provides assurance that feedback is not only heard but systematically evaluated and acted upon. The achievement supports stronger long-term partnerships, greater accountability, and more responsive service delivery while differentiating the company within the industry. It further confirms INSEE Ecocycle's commitment to improvement.

Kandy Esala Perahera Sustainability Partnership: Clean-Up Initiative & Derana Siri Dalada Program

During the Kandy Esala Perahera, INSEE Ecocycle partnered with the Kandy Municipal Council and the Derana Siri Dalada Program to support a large-scale clean-up initiative and promote responsible waste management practices. The collaboration integrated sustainability into one of Sri Lanka's most significant cultural and religious events, creating greater awareness of environmental responsibility while encouraging cleaner public spaces throughout the festival period.

The initiative provided a valuable platform to engage with local authorities, community members, media partners, and other key stakeholders, while showcasing practical and sustainable waste management solutions. Through this partnership, INSEE Ecocycle reinforced its commitment to supporting environmental stewardship and community-driven sustainability initiatives across the country.

The collaboration further strengthened stakeholder relationships as a trusted partner in sustainable waste management. Moving forward, INSEE Ecocycle will continue to work with communities, local authorities, and strategic partners to advance responsible waste management practices and drive meaningful environmental impact through collaborative action.

Strengthening stakeholder engagement - ICPIES 2026 International Conference

INSEE Ecocycle partnered with the Open University of Sri Lanka for the International Conference on Plastics, Innovation & Environmental Sustainability (ICPIES) 2026, strengthening engagement with industry stakeholders, academia, and key policymakers to advance discussions on sustainable waste management and circular economy solutions. The conference provided an important platform for knowledge sharing, collaboration, and dialogue on emerging environmental challenges, innovative technologies, and responsible resource management practices.

Through its participation, INSEE Ecocycle reinforced its commitment to promoting waste-to-resource solutions and supporting initiatives that drive environmental sustainability. The engagement also created valuable opportunities to strengthen relationships with industry leaders, academic institutions, and regulatory stakeholders while contributing to discussions on practical approaches to addressing plastic waste and resource recovery challenges.

The partnership further enhanced INSEE Ecocycle's position as a leading advocate for sustainable waste management and circular economy practices in Sri Lanka. Moving forward, the company will continue collaborating with key stakeholders to advance innovative waste management solutions, promote responsible environmental practices, and support the transition towards a more circular and sustainable future

INSEE Ecocycle Team Wins Bronze at SLIM DIGIS 2026

The INSEE Ecocycle team was recognized with a Bronze Award at SLIM DIGIS 2026, marking a significant achievement in the company's journey of digital innovation and sustainability-focused marketing. The award acknowledges the success of strategic digital marketing initiatives designed to raise awareness of sustainable waste management while effectively engaging customers and stakeholders through impactful and purpose-driven communication.

This recognition reinforces INSEE Ecocycle's brand credibility and validates its approach to leveraging digital platforms to promote sustainability and environmental responsibility. The achievement also reflects the creativity, dedication, and collaborative efforts of the team in delivering meaningful campaigns that align with the company's commitment to creating positive environmental impact.

The award further strengthens stakeholder confidence in the INSEE Ecocycle brand and positions the company as a leader in sustainability communications within the industry. Moving forward, INSEE Ecocycle will continue to build on this success by expanding innovative digital marketing initiatives, showcasing sustainability achievements, and driving greater stakeholder engagement.

Expanding Industrial Outreach and Strengthening Customer Connections through HSE Engagement

In July 2026, INSEE Ecocycle participated in an external Occupational Safety & Hygiene (HSE) seminar, reaching 45 potential customers from 44 companies. The event provided a valuable platform to introduce Ecocycle's comprehensive waste management services and sustainable co-processing solutions to industrial professionals. Through direct engagement with HSE and safety representatives, Ecocycle enhanced its industry visibility, established new business connections, and gathered potential customer contacts for further follow-up, supporting its efforts to expand market reach and develop long-term business opportunities.

Fostering Industry Collaboration at Hiep Phuoc Industrial Park

INSEE Ecocycle strengthened its engagement with the Management Board of Hiep Phuoc Industrial Park in August 2026, exploring potential collaboration in waste management and sustainable industrial development. The discussions provided an opportunity to introduce Ecocycle's integrated environmental solutions, exchange perspectives on industrial waste management needs, and identify areas for future cooperation. This engagement established a foundation for further collaboration, including technical knowledge-sharing initiatives and potential business opportunities, reinforcing Ecocycle's commitment to supporting sustainable practices across Vietnam's industrial communities.

Strengthening Industry Connections at Vietnam Footwear Summit 2026

On September 16–17, 2026, INSEE Ecocycle participated in the Vietnam Footwear Summit 2026, connecting with over 150 industry participants and generating 58 customer and prospect contacts. Through its presentation on waste-to-value solutions and best practices for the footwear industry, Ecocycle highlighted the importance of responsible waste management and sustainable co-processing in addressing industry-specific challenges. Supported by on-site engagement and targeted communications, the event reinforced Ecocycle's position as a sustainable waste management solutions provider, while creating valuable opportunities for further collaboration with footwear manufacturers and industry partners.

Strengthening Customer Partnerships and Driving Sustainable Business Growth

Throughout Q3 2026, INSEE Ecocycle strengthened customer partnerships through site visits and audits involving key customers, including Adidas, Nike, Coats Phong Phu, POVO, and Kureha. These engagements provided opportunities to demonstrate operational transparency, regulatory compliance, and the reliability of Ecocycle's waste management and co-processing solutions.

Beyond operational engagement, Ecocycle reinforced its commitment to sustainability through initiatives involving 42 representatives from Adidas and Nike supplier factories, including a visit to the Hon Chong Plant and tree-planting activities in Phu My – Giang Thanh, An Giang, where 18,300 trees were planted.

Additionally, the successful destruction of 52.469 tonnes of Lululemon products under customs supervision demonstrated Ecocycle's capability to deliver specialized waste management services.

Alongside these initiatives, Ecocycle expanded its commercial footprint with 17 new customers and sites in Q3 2026, reinforcing customer confidence, strengthening long-term partnerships, and creating new opportunities for sustainable business growth.
