

Analytical Services by Ecocycle

Precision and Peace of Mind Guaranteed

INSEE Ecocycle Lanka is Sri Lanka's pioneer in sustainable industrial waste management. Drawing from two decades of specialised expertise and the endorsement of over 1000 satisfied corporate customers, we continue to expand our industry-leading environmental services portfolio to reliably meet evolving testing demands of our clients.

Analytical Testing with Ecocycle

With ISO 17025-accredited, advanced laboratories equipped with ultra-modern testing equipments and staffed by qualified chemists, we offer analytical services under 3 main categories:

Wastewater Testing

- Testing offered for chemical, physical and microbiological parameters
- Compliant with Environmental Protection Licence (EPL) requirements

Organic Fertiliser Testing

- Testing offered for chemical, physical and microbiological parameters
- Compliant with local and international standards

Fuel Testing

- Traditional and alternative fuel testing offered for chemical and physical parameters
- Sought-after expertise in fuel testing with two decades of practice

Accreditation and Certifications

- Registered laboratories under Central Environmental Authority
- ISO 17025 accredited laboratories and ISO 9001, 14001 & 45001 certifications

Our Service Excellence

- **Compliant with ISO Standards and Globally Accepted Regulations**

ISO 17025 accredited laboratories with ISO 9001, ISO 14001 and ISO 45001 certifications.

- **Regional Laboratory Footprint**

Connected to a network of Ecocycle laboratories spread across Thailand, Cambodia and Vietnam to draw upon collective resources and expertise.

- **Hassle-free Sample Collection**

Dedicated, professional sample collection personnel equipped with essential instruments, proficiency and on-site expertise.

- **Performance Verification with Proficiency Testing**

Participating in independent proficiency tests carried out by globally benchmarked laboratories to verify our performance and testing accuracy.

- **Accurate and Precise Results**

Equipped with the latest in technology, technical expertise and ultra-modern instruments to guarantee the most accurate and precise test results.

- **Two Decades of Expertise**

Powered by accumulated knowledge, localised industry insight and analytical expertise since our establishment in 2003 as a pioneering waste management and environmental solutions provider in Sri Lanka.

- **Customised Testing Solutions**

Providing total testing solutions customised for each client across all required parameters falling under our testing scope.

- **Strong Partnership with Renowned Local and Global Laboratories**

Promoting collaboration and knowledge-sharing across the analytical services landscape by nurturing strong, mutually beneficial partnerships with peer laboratories.

Valued Added Services

Integrated waste management solution for laboratory wash-off and obsolete chemicals

In addition to our analytical services portfolio, Ecocycle also provides an integrated waste management solution for laboratory wash-off and obsolete chemicals, managing waste in both a responsible and environmentally friendly manner. Our integration solution includes:

- Designing and engineering a laboratory wash-off collection point
- Periodic wash-off collection
- Quality controlling and waste logistics
- Client-specific training on handling chemical and laboratory wash-off waste
- Sustainable solution for the waste
