Sustainable Waste Management and Industrial Services

INSEE Ecocycle is a subsidiary of Siam City Cement Group, offering sustainable solutions to a range of industries in various sectors. We believe in partnering with our customers and stakeholders to develop and deliver “peace-of-mind” waste management and industrial service solutions. Our mission is to earn respect and trust through safeguarding our customers’ reputations and improving their environmental footprint.

Peace of Mind Partnership

Whether as a corporate citizen or as a trusted brand among consumers, preserving your company’s reputation is vital for the ongoing success of your business. INSEE Ecocycle provides best practice, sustainable solutions within true collaborative partnerships. Our task is to earn respect and trust by safeguarding our customers’ reputations. We believe this is the only way our partners can have true peace of mind when it comes to waste management and industrial services.

Experts : We are committed to creating a positive, sustainable future. We leverage our knowledge to create cleaning and waste management processes that help us achieve greater sustainability.

Specialists : We offer our customers a wide range of specialist industrial services. We manage residuals and hazardous waste generated from cleaning processes in a sustainable manner within full compliance of all regulatory requirements.

Service Driven : Our team is committed to partners by offering quality driven operations. We deliver the highest quality work and ensure complete customer satisfaction by constantly improving our services.

Safety Leaders : Safety is of paramount importance to us. We believe that Zero Harm is attainable and strive to build the most efficient organization. Safety leadership is critical to our Zero Harm culture. We continuously conduct specialized safety leadership development programs while all INSEE Ecocycle employees are mentored to drive our health and safety performance with passion, energy and a clear vision.
